## INTRODUCTION

This report presents final figures from the 1976 Census on private household characteristics by level of schooling and mother tongue of head.

Tables 1 and 2 show data on private households by number of persons per household (ranging from 1 to 10+), in relation to level of schooling and mother tongue of head. Tables 3 and 4 present data on private households by type, showing level of schooling and mother tongue of head. Tables 5 and 6 present data on private households by marital status, sex and age of head, in relation to level of schooling and mother tongue of head. Tables 1, 3 and 5 are for Canada and the provinces, while Tables 2, 4 and 6 are for census metropolitan areas.

All of the tables in this report refer only to persons 15 years and over.

Where applicable, relevant parts of the Census questionnaire and instructions are reproduced in the Introduction to Volume 3 (Catalogue No. 93-800).

### DEFINITIONS

**Household:** Refers to a person or group of persons (other than foreign residents) who occupy a dwelling and do not have a usual place of residence elsewhere in Canada. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, a group of unrelated persons, or one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household.

Households are classified into three groups: (1) A PRIVATE household refers to persons (other than foreign residents) who occupy private dwellings and do not have a usual place of residence elsewhere in Canada. (2) A COLLECTIVE household consists of persons (other than foreign residents) who occupy collective dwellings and do not have a usual place of residence elsewhere in Canada. (3) A HOUSEHOLD OUTSIDE CANADA refers to military, diplomatic or other government personnel together with their dependents who reside outside Canada. Unless otherwise specified, all data in household reports are for private households only.

**Private Household:** Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

**Type of Private Household:** Refers to the basic division of private households into family and non-family households.

**FAMILY HOUSEHOLD** refers to a household that contains at least one census family. **ONE-FAMILY HOUSEHOLD** refers to a single census family that occupies one private dwelling. The family may be that of the household head or one living as a related, lodging or other type of family with a household head who is a non-family person. A **MULTIPLE-FAMILY HOUSEHOLD** is one in which two or more census families occupy the same private dwelling. One family may be that of the household head, or the household head may be a non-family person with whom two or more census families are residing.

**NON-FAMILY HOUSEHOLD** refers to one person who lives alone in a private dwelling, or to a group of persons who occupy one private dwelling and do not constitute a census family.

Ce bulletin présente les chiffres définitifs du recensement de 1976 sur les caractéristiques des ménages privés selon le niveau de scolarité et la langue maternelle du chef.

Les tableaux 1 et 2 renferment des données sur les ménages privés selon le nombre de personnes par ménage (allant de 1 à 10 personnes et plus), par niveau de scolarité et langue maternelle du chef. Les tableaux 3 et 4 présentent des données sur les ménages privés selon le genre, par niveau de scolarité et langue maternelle du chef. Les tableaux 5 et 6 présentent des données sur les ménages privés selon l'état matrimonial, le sexe et l'âge du chef, par niveau de scolarité et langue maternelle du chef. Les tableaux 1, 3 et 5 portent sur le Canada et les provinces et les tableaux 2, 4 et 6, sur les régions métropolitaines de recensement.

Toutes les données des tableaux de ce bulletin se rapportent aux personnes âgées de 15 ans et plus seulement.

Au besoin, certaines parties du questionnaire du recensement et des instructions ont été insérées dans l'Introduction au volume 3 (n° 93-800 au catalogue).

### DÉFINITIONS

**Ménage:** Personne ou groupe de personnes (autres que des résidents étrangers) occupant un même logement et n'ayant pas de lieu de résidence habituelle ailleurs au Canada. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Les membres d'un ménage qui sont temporairement absents le jour du recensement (par exemple, résidents temporaires ailleurs) sont considérés comme faisant partie de leur ménage habituel. Pour les fins du recensement, chaque personne est membre d'un seul et unique ménage.

Les ménages sont classés en trois catégories: (1) un ménage PRIVÉ, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements privés et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (2) un ménage COLLECTIF, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements collectifs et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (3) un MÉNAGE À L'EXTÉRIEUR DU CANADA, c'est-à-dire le personnel militaire, diplomatique et autres fonctionnaires, ainsi que les personnes qui sont à leur charge, qui demeurent à l'extérieur du Canada. Sauf indication contraire, toutes les données présentées sur les ménages se rapportent aux ménages privés uniquement.

**Ménage privé:** La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

**Genre de ménage privé:** Répartition fondamentale des ménages privés en ménages familiaux et ménages non familiaux.

**MÉNAGE FAMILIAL** comprend au moins une famille de recensement. Un **MÉNAGE UNIFAMILIAL** se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille du chef de ménage ou d'une famille apparentée, d'une famille chambreuse ou de tout autre genre de famille vivant avec un chef de ménage hors famille. Un **MÉNAGE MULTIFAMILIAL** se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle du chef de ménage ou il peut s'agir d'un chef de ménage hors famille vivant avec deux familles de recensement ou plus.

Un **MÉNAGE NON FAMILIAL** est constitué d'une personne vivant seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

## DEFINITIONS — Continued

**Household Head:** For census purposes, every household has a head and only one person is so designated. This is either the husband or the wife; the parent where there is one parent only, with one or more children (who have never married, regardless of age); or any member of a group sharing a dwelling equally. A person occupying a dwelling alone is always reported as the head. The minimum age for the head of household is 15 years.

**Census Family:** Consists of a husband and a wife (with or without children who have never married, regardless of age) or a lone parent, regardless of marital status, with one or more children (who have never married, regardless of age) living in the same dwelling. Persons living common-law are directed to report as now married on the census questionnaire. Such persons are therefore indistinguishable from those who are legally married and will appear as a husband-wife family in the census reports. Unless otherwise specified, all family data in family and housing reports are for census families.

**Age:** Age refers to the number of completed years of age at last birthday, and is computed on the basis of the census questionnaire item on date of birth.

**Marital Status:** Refers to the categories single (never married), married, widowed, separated and divorced. Note in particular that:

**Married** includes persons living common-law;

**Separated** includes married persons who have been deserted or have parted because they no longer wish to live together but have not obtained a divorce; this category, therefore, includes separations whether legal or otherwise.

In most tables, the married and the separated categories are reported together under the heading "married".

**Level of Schooling:** Level of schooling refers to the highest grade or year of elementary/secondary attended, or the highest year of post-secondary non-university or university completed by the person. Those currently enrolled reported their present grade or year. University is defined as a degree-granting institution which grants a degree, certificate or diploma upon successful completion of a programme of studies. Post-secondary non-university training is obtained at a non-degree granting educational institution (e.g., community college, CEGEP, nursing school).

**Degrees/Diplomas/Certificates:** A secondary (high) school graduation certificate or diploma is one which is classifiable as junior or senior matriculation, at the honours, general, technical or commercial levels. A non-university certificate or diploma is obtainable at institutions such as teachers' college, nursing school, community college, or CEGEP. A university certificate or diploma is obtainable in courses such as dental hygiene, occupational therapy, or agriculture. University degrees encompass the traditional Bachelor, Master's and Doctorate degrees, as well as the "Medical" category which includes degrees in medicine, dentistry or veterinary medicine.

**Mother Tongue:** The language first learned and still understood. Infants who have not yet learned to speak are considered to have as mother tongue the language most often spoken in the home.

## DÉFINITIONS — suite

**Chef de ménage:** Pour les fins du recensement, chaque ménage doit avoir un chef et seulement un membre du ménage peut l'être. Il peut s'agir de l'époux ou de l'épouse; du père ou de la mère, s'il n'y en a qu'un des deux, avec des enfants jamais mariés (quel que soit leur âge) ou n'importe quel membre d'un groupe partageant un logement à parts égales. Une personne occupant seule un logement est toujours le chef. Le chef de ménage doit être âgé d'au moins 15 ans.

**Famille de recensement:** Époux et épouse avec ou sans enfants jamais mariés (peu importe leur âge) ou l'un ou l'autre des parents (peu importe l'état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Les personnes qui vivent en concubinage doivent indiquer qu'elles sont actuellement mariées dans le questionnaire du recensement. Par conséquent, aucune distinction n'est faite entre ces personnes et les personnes mariées légalement; elles figurent comme époux et épouses dans les bulletins du recensement. Sauf indication contraire, toutes les données sur la famille présentées dans les bulletins sur le logement et la famille se rapportent aux familles de recensement.

**Âge:** L'âge représente le nombre d'années révolues au dernier anniversaire et il est calculé à partir de la date de naissance indiquée sur le questionnaire du recensement.

**État matrimonial:** Indique la situation conjugale, c'est-à-dire célibataire (jamais marié), marié, veuf, séparé et divorcé. Il convient de signaler que la catégorie

**marié** comprend les personnes vivant en concubinage;

**séparé** comprend les personnes mariées qui ont été abandonnées ou qui sont séparées de leur conjoint parce qu'elles ne veulent plus vivre avec lui, mais qui n'ont pas obtenu le divorce; cette catégorie vise donc les personnes séparées légalement ou non.

Dans la plupart des tableaux, les personnes mariées et les personnes séparées figurent sous la même rubrique, c'est-à-dire "marié".

**Niveau de scolarité:** Le niveau de scolarité est la dernière année d'études primaires ou secondaires fréquentée ou la dernière année d'études postsecondaires non universitaires ou universitaires terminée par une personne. Les personnes qui fréquentent actuellement un établissement d'enseignement indiquent l'année où elles sont inscrites. L'université est définie comme étant un établissement d'enseignement qui décerne des grades, des certificats ou des diplômes aux personnes qui ont terminé avec succès un programme d'études. La formation postsecondaire non universitaire est offerte dans les établissements d'enseignement qui ne décernent pas de grades, par exemple, les collèges communautaires, les CEGEP, les écoles de sciences infirmières.

**Grades, diplômes, certificats:** Un certificat ou un diplôme de fin d'études secondaires (high school) est l'équivalent du "junior matriculation" ou "senior matriculation" au niveau des études spécialisées, générales, techniques ou commerciales. Un certificat ou un diplôme non universitaire peut être obtenu dans des établissements d'enseignement tels que les écoles normales, les écoles de sciences infirmières, les collèges communautaires, ou les CEGEP. Un certificat ou un diplôme universitaire est décerné pour des cours tels que l'hygiène dentaire, l'ergothérapie ou l'agriculture. Les grades universitaires sont le baccalauréat, la maîtrise et le doctorat. Il y a également les grades en médecine, en art dentaire ou en médecine vétérinaire.

**Langue maternelle:** Première langue apprise et encore comprise. Dans le cas des enfants en bas âge, la langue maternelle est la langue le plus souvent parlée à la maison.

## DEFINITIONS — Concluded

**Province:** Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

**Census Metropolitan Area (CMA):** The main labour market area of an urbanized core (or continuous built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of their largest city. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core, and (2) other municipalities, if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

## SAMPLING AND WEIGHTING

The information in this report was collected on a 33 1/3% sample basis and weighted to population totals. As a result, the number of households for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official count of households (see Catalogue No. 93-805). All table headings are noted as to the basis on which data were collected. Information on sampling and weighting systems can be found in a study entitled "Quality of Data, 1976 Census, Series I: Sources of Error — The Effect of Sampling and Weighting on Data Quality".

## CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly. Additional details on the random rounding technique may be obtained by writing Census Information Services (see back cover).

## BASIC MEASURES OF DATA QUALITY

### Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population.

## DÉFINITIONS — fin

**Province:** Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

**Région métropolitaine de recensement (RMR):** Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants ou plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la ville principale. Elles renferment des municipalités (ou des subdivisions) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités, a) si au moins 40 % de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou b) si au moins 25 % de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

## ÉCHANTILLONNAGE ET PONDÉRATION

Les renseignements de la présente publication ont été recueillis à partir d'un échantillon de 33 1/3 % et pondérés en fonction des chiffres totaux de la population. Il s'ensuit que le nombre de ménages pour une région géographique donnée n'est pas forcément le même que celui des publications dont les données avaient été recueillies à 100 %. Bien entendu, c'est ce dernier chiffre qui représente le nombre officiel de ménages (voir la publication n° 93-805 au catalogue). Tous les titres des tableaux contiennent une note précisant la base de la collecte des données. Des renseignements concernant les systèmes d'échantillonnage et de pondération figurent dans une étude intitulée: "Qualité des données, recensement de 1976, Série I: Les effets de l'échantillonnage et de la pondération sur la qualité des données".

## CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de "5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme des pourcentages qui sont calculés à partir des chiffres arrondis ne correspond pas forcément au total. La plupart des répartitions en pourcentage et des taux sont basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont fondées sur des données non arrondies. Les utilisateurs sont priés de remarquer que chaque tableau est annoté en conséquence. On peut obtenir plus de détails sur l'arrondissement aléatoire en s'adressant à l'Information recensement (voir la couverture arrière).

## MESURES DE BASE DE LA QUALITÉ DES DONNÉES

### Erreur de couverture

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-représenter la population réelle.

On a mené une étude spéciale concernant le recensement de 1976 afin de mesurer l'importance des biais attribuables au sous-dénombrement. On a estimé que le taux global du sous-dénombrement représentait 2 % de la population totale.

## BASIC MEASURES OF DATA QUALITY — Continued

Evidence from studies of coverage errors in earlier censuses indicates that undercoverage is not evenly distributed throughout the population but tends to be higher in certain segments of the population, e.g., young male adults, recent immigrants.

Further details on this study may be obtained by contacting Census Information Services (see back cover).

## Response Rates

The table below presents the response rates obtained in the 1976 Census for the stated characteristics. A response rate is defined as the number of times the value of the characteristic was obtained divided by the number of times it should have been obtained.

These response rates are published in order to give an indication, for each characteristic, of the proportion of cases which required imputation for non-response.

## MESURES DE BASE DE LA QUALITÉ DES DONNÉES — suite

Des études d'erreurs de couverture effectuées à l'occasion de recensements antérieurs ont révélé que le taux de sous-dénombrement n'était pas également réparti dans toute la population, mais qu'il avait tendance à être plus élevé pour certains segments de la population, par exemple, chez les jeunes adultes de sexe masculin et les nouveaux immigrants.

On peut obtenir de plus amples renseignements sur cette étude en communiquant avec Information recensement (voir la couverture arrière).

## Taux de réponse

Le tableau ci-dessous présente les taux de réponse obtenus lors du recensement de 1976 relativement aux caractéristiques citées. Le taux de réponse est égal au quotient du nombre de fois que la valeur de la caractéristique a été obtenue par le nombre de fois qu'on aurait dû l'obtenir.

Ces taux de réponse sont publiés afin d'indiquer, pour chaque caractéristique, le pourcentage de cas qui ont dû être imputés en raison de la non-réponse.

RESPONSE RATES FOR SELECTED CENSUS CHARACTERISTICS, 1976  
TAUX DE RÉPONSE POUR CERTAINES CARACTÉRISTIQUES DU RECENSEMENT, 1976

Characteristics — Caractéristiques	Response rate (%) — Taux de réponse (%)
Age — Âge .....	98.4
Marital status — État matrimonial .....	98.0
Mother tongue — Langue maternelle .....	98.1 <sup>1</sup>
Highest grade of elementary or secondary schooling — Niveau de scolarité primaire ou secondaire .....	95.0
Years of post-secondary non-university education — Nombre d'années de formation postsecondaire non universitaire .....	94.3
Years of university level education — Nombre d'années d'études de niveau universitaire .....	94.2
Degree, certificate or diploma — Grade, certificat ou diplôme .....	94.2
Sex — Sexe .....	98.6

<sup>1</sup> As imputation for non-response was not carried out for mother tongue, the response rate for mother tongue is the percentage of persons in the given language categories excluding the "not stated" category. — Comme nous n'avons pas procédé à l'imputation dans le cas des non-réponses attribuables à la langue maternelle, le taux de réponse relatif à cette question est égal au pourcentage de personnes faisant partie des catégories données sur la langue à l'exception de la catégorie "non déclaré".

## BASIC MEASURES OF DATA QUALITY -- Continued

Two or more persons — Deux personnes ou plus.....	9	12	17	27	38	54	86	121	172	271	384	858	..	...	...	...	

<sup>1</sup> These correspond to the reliability measures that were presented as root mean square errors or reliability estimates in the 1971 Census publications. — Ces estimations correspondent aux mesures de fiabilité présentées comme écarts quadratiques moyens ou estimations de fiabilité dans les publications du recensement de 1971.

## BASIC MEASURES OF DATA QUALITY - Concluded

figures. These include the effects of sampling (where applicable) as well as the random or non-systematic components of response and processing errors. The total standard errors, however, do not include allowances for systematic errors such as coverage errors, biases due to similar misinterpretations of concepts by many respondents, or systematic processing errors. These estimates of reliability are published to give an indication of the level of error only and are not meant for use in hypothesis testing or detailed analysis.

Users wishing to obtain TSE estimates for a given cell of data in any table in the Volume Series should follow these procedures:

1. Determine if the table is based on the complete census or on the one-third sample.
2. Determine the categories defining the cell. In some cases, this may be just a single category (e.g., age 25-29), while for a cell in a cross-classification involving several variables, there may be several categories (e.g., married males aged 25-29).
3. Referring to the TSE table locate the cell-defining category which presents the highest value. Any column can be used for this comparison. For those categories where both 100% and sample TSE values are shown, use only the 100% rows for tables based on the complete census and only the sample rows for tables based on the one-third sample (see step 1).
4. Choose the column in the TSE table whose heading is closest to the value of the given cell in the census table. Approximations for intermediate values may be achieved by linear interpolation.
5. Read off the figure from the row (determined in step 3) and column (determined in step 4) of the TSE table.

When using these figures, the user can be reasonably certain that, for the enumerated population, the true value (discounting systematic and coverage errors) lies within plus or minus twice the total standard error (e.g., for a figure of 100 with a hypothetical TSE of 3, the range would be  $100 \pm 6$ ) and virtually certain that it lies within plus or minus three times the total standard error (e.g., for the same figure of 100 with a hypothetical TSE of 3, the range would be  $100 \pm 9$ ).

## SYMBOLS

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

## MESURES DE BASE DE LA QUALITÉ DES DONNÉES - fin

de 1976. L'erreur type totale englobe les effets de l'échantillonnage (s'il y a lieu) ainsi que les composantes aléatoires et non systématiques des erreurs de réponse et de dépouillement. Cependant, l'erreur type totale ne comprend pas les erreurs systématiques telles que les erreurs de couverture, les biais découlant d'une mauvaise compréhension des concepts par plusieurs recensés et les erreurs systématiques de dépouillement. Ces estimations de fiabilité sont présentées uniquement pour donner une indication du niveau d'erreur dans les chiffres du recensement et ne doivent pas être utilisées pour faire des tests d'hypothèses ou effectuer une analyse détaillée.

Les lecteurs qui veulent calculer des estimations de l'ETT pour une case donnée d'un tableau quelconque de cette série devront procéder de la façon suivante:

1. Déterminer si le tableau est fondé sur le recensement exhaustif ou sur l'échantillon partiel (un tiers).
2. Déterminer les catégories qui définissent la case. Dans certains cas, il peut n'y avoir qu'une seule catégorie (par exemple, les 25-29 ans), tandis que dans le cas des classements recoupés mettant en jeu plusieurs variables, il peut y en avoir plusieurs (par exemple, les hommes mariés âgés de 25 à 29 ans).
3. En consultant le tableau des ETT, situer la catégorie qui a la valeur la plus élevée. N'importe quelle colonne peut servir à cette comparaison. Dans le cas des catégories pour lesquelles sont indiquées les valeurs de l'ETT à la fois pour le recensement exhaustif et pour l'échantillon, utiliser uniquement les lignes du recensement pour les tableaux fondés sur le recensement exhaustif, et uniquement les lignes de l'échantillon pour les tableaux fondés sur l'échantillon d'un tiers des ménages (voir l'étape 1).
4. Dans le tableau des ETT, choisir la colonne dont l'en-tête se rapproche le plus de celle de la case donnée dans le tableau du recensement. Les approximations des valeurs intermédiaires peuvent être effectuées par interpolation linéaire.
5. Lire la valeur correspondant à la ligne (déterminée à l'étape 3) et à la colonne (déterminée à l'étape 4) du tableau des ETT.

L'utilisateur de ces chiffres peut être raisonnablement certain que, pour la population recensée, la vraie valeur (en faisant abstraction des erreurs systématiques et de couverture) se situe dans un intervalle de plus ou moins deux fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de  $100 \pm 6$ ). L'utilisateur peut être presque certain que cette valeur se situe dans un intervalle de plus ou moins trois fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de  $100 \pm 9$ ).

## SIGNES CONVENTIONNELS

- .. non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.

## Publications of the 1976 Census of Canada

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:<sup>1</sup>

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the *1976 Census Catalogue* which can be obtained free of charge from:

Publications Distribution,  
Room 1200, Statistics Canada,  
Ottawa, Ontario.  
K1A 0T6

To order census publications, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide other products and services about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

Census Information Services,  
Statistics Canada,  
Ottawa, Ontario.  
K1A 0T7

or call (613) 996-5254.

Inquiries about census and other Statistics Canada information can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

<sup>1</sup> It should be noted that these publications are generally released somewhat later than the data reports.

## Publications du recensement du Canada de 1976

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants<sup>1</sup>:

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au *Catalogue du recensement de 1976* que vous pouvez obtenir gratuitement auprès de:

Distribution des publications  
Pièce 1200, Statistique Canada  
Ottawa (Ontario)  
K1A 0T6

Envoyez vos commandes de publications du recensement à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers autres produits et services: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

Information recensement  
Statistique Canada  
Ottawa (Ontario)  
K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute demande de renseignement sur le recensement et les autres données de Statistique Canada peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

<sup>1</sup> Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
